Procedures

The primary data will be obtained through a focus group discussion (FGDs) and Indepth Interview (IDI). A total of 24 FGDs and 6 IDIs will be conducted to capture the perspectives of the three regions representing the major ethnic groups in the country.

Risks/discomforts

There are no possible risks in partaking in the study

Benefits

Participants are unlikely to experience any direct benefit from participating in this study. They will gain more knowledge from other people's discussion. We hope our results contribute to the field of gender study and eventually to help better improve even access of health facilities based on gender.

Payment

The participants will be paid N1000 each

Protecting data confidentiality

We will keep confidential all research records that identify you to the extent allowed by law. Your information will be combined with information from other people taking part in the study, so there will be no way of identifying your individual data once the study is complete. When we write about the study to share it with other researchers, we will write about only the combined information we have gathered. We will keep informed consent forms and data for a minimum of three years after the project closes, and we will retain deidentified data indefinitely. Data collected will be kept confidential

Add the following sections, if applicable (see instructional template).

If none are applicable, skip to section titled, "Who do I call if I have questions or problems?"
